

Momoza – Complete Digital Strategy & Business Plan

Prepared by: Farhan (Tech & Digital Partner)
Date: June 20, 2026
Client: Momoza – Homemade Momos Brand
Status: Draft – Awaiting Client Review

1. Understanding the Current Situation

Aspect	Current State
Product	Homemade momos – authentic, kitchen-made
Pricing	₹45-50 per plate (4 pieces)
Operations	Home kitchen based
Sales Channel	Word of mouth, local orders
Digital Presence	None
Delivery	Self-managed / local
Goal	Expand customer base, go digital, increase orders

The Core Problem

They have a great product but **zero digital presence**. Customers can't find them, can't order easily, and there's no brand identity. They're also worried about Swiggy/Zomato eating into their margins.

2. Swiggy/Zomato – Should They Join?

 **Short answer: NOT right now.** Here's why.

Aggregator Cost Breakdown

Platform	Commission	GST on Commission	Packaging Mandate	Effective Cut
Swiggy	18-25%	18% on commission	₹5-8/order	~30-35% total
Zomato	18-25%	18% on commission	₹5-8/order	~30-35% total

Example on a ₹50 plate:

- Swiggy/Zomato commission (~25%): **₹12.50**
- GST on commission (18%): **₹2.25**
- Packaging cost: **₹5-8**
- **Net earning per plate: ₹27-30** (from ₹50)

At this price point, aggregators will **destroy margins**. They make sense only when:

- Average order value is ₹200+
- You have a dedicated kitchen staff
- You want brand discovery (not profit)

Recommendation

Stage	Platform Strategy
Now (Month 1-6)	Direct orders only – Website + WhatsApp + Instagram
Later (Month 6-12)	Consider Zomato/Swiggy ONLY for visibility, not as primary channel
Growth (Year 2+)	Use aggregators strategically with higher-priced combos/meals

3. What I (Farhan) Am Offering

Services Package

#	Service	Description	Priority
1	Website Development	Professional brand website with menu, about, contact & ordering	● Immediate
2	WhatsApp Ordering System	Customers select items → order sent directly via WhatsApp	● Immediate
3	Brand Identity Setup	Logo refinement, color palette, consistent visual identity	● Week 1-2
4	Instagram Page Setup	Profile setup, content templates, initial posts	● Week 2-3

#	Service	Description	Priority
5	Google My Business	Local SEO listing so people can find them on Google Maps	🟡 Week 2
6	Review Collection System	Simple system to collect & showcase customer reviews	🟢 Month 2
7	Customer Database	Track repeat customers, order history	🟢 Month 2-3
8	Business Dashboard	Orders, revenue, best-sellers, analytics	🟢 Future

4. Website Development – Detailed Plan

4.1 Website Structure

momoza.in (or similar)

- └─ 🏠 Home / Landing Page
 - └─ Hero section – Brand tagline + food imagery + "Order Now" CTA
 - └─ USP highlights – "Homemade", "Fresh Daily", "₹45 onwards"
 - └─ Featured menu items (top 3-4)
 - └─ Customer testimonials/reviews
- └─ 📋 Menu
 - └─ Category-wise display (Veg Momos, Non-Veg, Special, Combos)
 - └─ Each item: Photo, Name, Price, Description
 - └─ "Add to Order" interaction
 - └─ Order summary → Send via WhatsApp
- └─ 📖 About Us
 - └─ The family story – why they started
 - └─ The homemade promise
 - └─ Kitchen photos (authenticity)
 - └─ Team/family photo
- └─ ★ Reviews
 - └─ Customer testimonials
 - └─ Google/Instagram review embeds
 - └─ "Leave a Review" CTA
- └─ ☎ Contact

- | | — WhatsApp direct link
- | | — Phone number
- | | — Delivery area/radius info
- | | — Operating hours
- | | — Location (if applicable)
- |
-  Order Flow (integrated, not a separate page)
 - | — Select items + quantities from menu
 - | — Review order summary
 - | — Enter name + address + phone
 - | — "Send Order on WhatsApp" → opens WhatsApp with pre-filled message

4.2 WhatsApp Order Flow

This is the **core feature** – no payment gateway needed initially, just direct WhatsApp ordering.

Customer Journey:

1. Customer visits website
↓
2. Browses menu → selects items + quantity
↓
3. Clicks "Order Now"
↓
4. Enters: Name, Phone, Address
↓
5. Reviews order summary with total
↓
6. Clicks "Send Order via WhatsApp"
↓
7. WhatsApp opens with pre-formatted message:

```
| 🍜 *New Order — Momoza*
|
| *Items:*
| • Veg Momos x2 — ₹90
| • Chicken Momos x1 — ₹50
|
| *Total: ₹140*
|
| *Name:* Rahul Sharma
```

```
| *Phone:* 9876543210 |
| *Address:* B-12, Sector 5, Noida |
|
| *Payment:* Cash on Delivery |
|_____|
```

↓

8. Owner receives order on WhatsApp

↓

9. Owner confirms with reply

↓

10. Prepares & delivers / customer picks up

Why WhatsApp?

- Zero cost for the business
- Customers already use it daily
- Personal touch – builds trust
- No payment gateway fees (COD initially)
- Owner gets direct customer relationship

4.3 Tech Stack

Component	Technology	Why
Frontend	HTML + CSS + JavaScript	Fast, no hosting complexity, fully custom
Styling	Custom CSS with modern design	Premium look, animations, responsive
Hosting	Netlify / Vercel (free tier)	Zero cost, fast CDN, custom domain support
Domain	momoza.in / momozamomos.com	₹500–800/year
WhatsApp API	wa.me deep links	Free, no API costs
Analytics	Google Analytics (free)	Track visitors, popular items
Images	Optimized WebP	Fast loading on slow connections

4.4 Design Direction

Element	Direction
Color Palette	Warm reds, oranges, cream – food-friendly, appetizing
Typography	Modern, clean – Google Fonts (Outfit / Poppins)
Imagery	Real food photos – close-ups, steam, freshness

Element	Direction
Vibe	Warm, homemade, trustworthy, premium-local
Mobile First	80%+ traffic will be mobile – design for phones first
Animations	Subtle – food reveals, smooth scrolls, hover effects

5. Instagram & Social Media Strategy

5.1 Instagram Setup

Element	Recommendation
Handle	@momoza.momos or @momoza.official
Bio	"🥟 Homemade Momos · Fresh Daily · ₹45 onwards · 📍 [City] · Order 📞"
Link in Bio	Website link (use Linktree or direct)
Highlights	Menu, Reviews, How We Make, Order Now
Content Style	Reels-heavy (food reels go viral easily)

5.2 Content Calendar (First Month)

Week	Content Type	Posts
Week 1	Launch Announcement	3 posts – teaser, reveal, menu
Week 2	Behind the Scenes	2 reels – making process, kitchen setup
Week 3	Customer Focus	2 posts – first reviews, customer photos
Week 4	Engagement	2 reels + 1 story poll – "which flavor next?"

5.3 Content Ideas That Work for Food

- 🎬 **Reels:** Momos being wrapped (satisfying), steam rising, first bite reaction
- 📸 **Posts:** Flat-lay menu shots, combo offers, festival specials
- 📊 **Stories:** Daily polls, "guess the filling", order-of-the-day
- 💬 **Engagement:** Reply to every comment, repost customer stories

Instagram Reels are FREE marketing. A single viral reel can bring 100+ orders. The food category is one of the easiest to go viral in. This should be a priority alongside the website.

6. Google My Business (Local SEO)

This is **FREE** and incredibly powerful. When someone searches "momos near me" on Google, Momoza should show up.

Setup Checklist

- ☐ Create Google Business Profile
 - ☐ Add business name, address, phone, hours
 - ☐ Upload 10+ high-quality food photos
 - ☐ Add menu with prices
 - ☐ Set delivery area
 - ☐ Ask early customers to leave Google reviews
 - ☐ Post weekly updates (like Instagram but on Google)
-

7. Review & Customer Management System

7.1 Review Collection

Method	How
After Delivery	Send WhatsApp message: "Hey! Hope you enjoyed the momos 🍡 Would you mind leaving us a quick review?" with Google Review link
On Website	Testimonial section with real customer names
On Instagram	Repost customer stories/reviews
Incentive	"Leave a review → Get ₹10 off next order"

7.2 Customer Database (Simple Start)

Start with a **Google Sheet** — no need to overcomplicate:

Column	Data
Customer Name	From WhatsApp orders
Phone Number	From WhatsApp
Address	From order

Column	Data
Order Date	When they ordered
Items Ordered	What they got
Order Value	Total ₹
Repeat Customer?	Yes/No
Notes	Preferences, feedback

This Google Sheet becomes the foundation for the future dashboard. No need to build software for this now — just discipline in recording orders.

8. Pricing & Menu Strategy

8.1 Current Menu Recommendations

Item	Price	Pieces	Strategy
Veg Momos	₹45	4 pcs	Entry-level, hook customers
Chicken Momos	₹50	4 pcs	Slightly premium
Paneer Momos	₹55	4 pcs	Premium veg option
Special/Cheese Momos	₹60	4 pcs	High-margin signature item
Combo: 8 pcs + Chutney	₹80-90	8 pcs	Increase average order value
Family Pack: 16 pcs	₹150-160	16 pcs	Bulk order, higher revenue

Key Insight: The single biggest lever for growth is **increasing average order value**. A ₹50 single plate is hard to sustain with delivery. Combos and family packs naturally push orders to ₹150-200+, making delivery viable and margins healthy.

8.2 Delivery Model

Radius	Strategy
0-3 km	Free delivery (self-delivery)
3-5 km	₹20 delivery charge
5+ km	Minimum order ₹200 for free delivery, else ₹30-40
Pickup	Always available, small discount as incentive

9. Phased Growth Roadmap

Phase 1: Digital Foundation (Month 1-2)

- ☒ Finalize brand name, logo, colors
- ☐ Build & launch website with WhatsApp ordering
- ☐ Set up Instagram page with 10+ initial posts
- ☐ Create Google My Business listing
- ☐ Start collecting customer data in Google Sheets
- ☐ Launch with friends & family, collect first 20 reviews

Goal: 5-10 orders/day through website + Instagram

Phase 2: Growth & Engagement (Month 3-4)

- ☐ Consistent Instagram content (3-4 posts/week)
- ☐ Instagram Reels strategy – target 1 viral reel
- ☐ WhatsApp Broadcast list for repeat customers
- ☐ Introduce combo meals and family packs
- ☐ Partner with local communities/societies for bulk orders
- ☐ Festival special menus (Diwali, Navratri, etc.)

Goal: 15-25 orders/day

Phase 3: Optimization & Systems (Month 5-6)

- ☐ Build simple dashboard (daily orders, revenue, best-sellers)
- ☐ Automated WhatsApp responses (greeting, menu, order confirmation)
- ☐ Customer loyalty program (5th order free, referral discount)
- ☐ Explore cloud kitchen license if volume demands
- ☐ Consider FSSAI license (mandatory for scaling)

Goal: 30-50 orders/day, breakeven on kitchen costs

Phase 4: Scale (Month 7-12)

- ☐ Join Swiggy/Zomato with premium combos (₹200+ items only)
- ☐ Full business dashboard with analytics

- ☐ Hire delivery partner or tie up with Dunzo/Porter
- ☐ Explore second kitchen location or cloud kitchen
- ☐ Online payment integration (UPI on website)
- ☐ Catering & party orders system

Goal: 50–100 orders/day, multiple revenue channels

10. Revenue Projections (Conservative)

Metric	Month 1	Month 3	Month 6	Month 12
Orders/day	5	15	35	70
Avg order value	₹80	₹120	₹150	₹180
Daily revenue	₹400	₹1,800	₹5,250	₹12,600
Monthly revenue	₹12,000	₹54,000	₹1,57,500	₹3,78,000
Est. profit margin	40%	45%	50%	50%
Monthly profit	₹4,800	₹24,300	₹78,750	₹1,89,000

These are conservative estimates assuming gradual organic growth. Viral Instagram content or festival seasons can spike these significantly.

11. Legal & Compliance Checklist

Item	When	Cost (Approx)
FSSAI Registration	Before Month 3 (mandatory for food business)	₹100 (basic registration)
FSSAI License	When revenue > ₹12L/year	₹2,000–5,000
GST Registration	When revenue > ₹20L/year	Free
Trade License	Check local municipal rules	₹500–2,000
Fire Safety	If setting up cloud kitchen	Varies

 **FSSAI Registration is legally required** for any food business in India – even home-based ones. Get this done early. It also builds customer trust when displayed on packaging and website.

12. Budget Summary for Client

Upfront Costs (What They Need to Spend)

Item	Cost	Notes
Domain name	₹500-800/year	momoza.in or similar
Website hosting	₹0	Free tier (Netlify/Vercel)
FSSAI Registration	₹100	Basic registration
Packaging (branded)	₹2,000-3,000	Initial batch of boxes/stickers
Food photography	₹0-1,000	DIY with phone or hire once
Total initial investment	₹3,000-5,000	

My (Farhan's) Service Fees

Service	Suggested Pricing	Notes
Website Development	₹_____	One-time
Instagram Setup + 10 Posts	₹_____	One-time
Google My Business Setup	₹_____ (or bundled)	One-time
Monthly Maintenance	₹_____/month	Updates, content help
Future Dashboard	₹_____	When they're ready

Fill in your pricing above. Consider offering a **bundle deal** for website + Instagram + Google setup to make it a no-brainer for the client.

13. Immediate Next Steps

#	Action	Owner	Deadline
1	Finalize brand name, logo, and color palette	Farhan + Client	Week 1
2	Collect menu items, descriptions, and pricing	Client	Week 1
3	Food photography session (phone is fine)	Client	Week 1
4	Website development begins	Farhan	Week 1-2

#	Action	Owner	Deadline
5	Instagram page creation	Farhan	Week 2
6	Google My Business listing	Farhan	Week 2
7	FSSAI Registration application	Client	Week 2
8	Website launch + first Instagram posts	Farhan	Week 3
9	Soft launch to friends & family	Client	Week 3
10	Collect first 10 reviews	Client + Farhan	Week 4

14. Summary – Why This Approach Works

Traditional Approach	Our Approach
Join Swiggy/Zomato → lose 30%+ margins	Direct ordering → keep 100% revenue
Depend on platform algorithms	Build own customer base
No customer data	Own every customer's contact
Generic listing among 1000s	Unique brand website + Instagram
High monthly fees	Near-zero recurring costs
No control over branding	Full brand control

The strategy is simple: Build a brand, not just a listing. Own the customer relationship. Scale with systems, not with platform dependency.
